SENIOR SOFTWARE ENGINEER | TRUST & SAFETY | INTERNAL PLATFORMS

Software engineer with 5+ years of engineering experience and 10+ years building trust, safety, policy, and operational systems at internet scale. Former Reddit Safety Tools engineer and founding member of Reddit's Anti-Evil Operations organization. Experienced building internal platforms, moderation tooling, workflow automation, and operational systems that improve efficiency, reduce review time, and support user safety across large online communities.

Core Technologies

JavaScript • TypeScript • React • Redux • Python • Node.js • React Native • GraphQL • Next.js • Docker
• Kubernetes • GitHub Actions • Tailwind • Jest • React Testing Library

EXPERIENCE

Software Engineer

Independent Consultant | Jan 2025 – Present

- Built mobile applications including a social management platform and a transportation-hailing application serving indigenous communities in Panama.
- Modernized and maintained digital infrastructure for OEIS, a national network of interventional and endovascular physicians.
- Delivered full-stack solutions spanning frontend development, API integrations, workflow automation, and mobile deployment.

Front-End Engineer

Quintara Biosciences | Apr 2023 – Jan 2025

- Developed customer-facing ordering workflows supporting DNA sequencing requests from research institutions and commercial customers.
- Built systems integrating laboratory workflows with Google Sheets APIs and backend order management platforms.
- Streamlined order intake and operational processes used by lab technicians and internal operations teams.

Software Engineer, Safety Tools

Reddit | Apr 2020 – Feb 2023

- Built and maintained internal Trust & Safety platforms used to review, investigate, and process user reports across Reddit.
- Delivered 20+ product features supporting moderation workflows, permissions management, reviewer productivity, and abuse investigations.
- Created custom tooling that reduced ticket review time and improved operational efficiency for Safety Operations teams.
- Led development of multiple high-impact projects, including specialized abuse review workflows and keyboard-driven productivity tooling.
- Partnered directly with Safety, Policy, and Operations stakeholders to translate complex moderation challenges into scalable software solutions.
- Generated hundreds of thousands of dollars in operational savings through workflow automation and productivity improvements.

Safety Operations Specialist

Reddit | May 2016 – Apr 2020

- Helped build Reddit's Anti-Evil Operations organization during a period of rapid platform growth.
- Designed and helped shape the internal moderation and content-review systems later used by Safety teams.
- Contributed to policy launches involving Violent Content, Prohibited Goods, and Sexualization of Minors.
- Acted as a key bridge between Operations, Policy, and Engineering teams while scaling trust and safety processes.

Legal & Policy Associate

YouTube | Feb 2014 – May 2016

- Managed legal and policy escalations involving privacy, trademark, counterfeit, defamation, and government requests.
- Worked with global stakeholders, law enforcement agencies, and regulatory organizations.
- Contributed to policy initiatives balancing platform safety, legal compliance, and free expression.

EDUCATION

UC Davis

M.A., Communication

UC Berkeley

B.A., History, Magna Cum Laude
